Posture. FULL STOP invent/prove still parks outside THIS Soft SF task lift. This beat is **draft report language only** under OW 4830c870…. No tip edit. No CERT. No SendToAgent. invent HOLD 1fadc632… STANDS. invent-pending EMPTY for Agent. Prior Agent Cat B FINDINGS bridge-canonical 9b047680… left untouched (reports/ drift aea5bebc… not overwritten).

B. Soft SF frame — S²-11DM²ET-X as GR-extension Cat B umbrella

Per AMEND Soft SF 2c341bc7… §§1–3 (and Agent Soft SF ACK in bridge-canonical FINDINGS 9b047680…):

1. The **S²-11DM²ET-X** extension of general relativity **encompasses all of it on the Category B side.** Local Cat B (B1–B10), Non Local Cat B (NL-B1–B16 discussion surface), and Agent/MR1 Rules 4–5 AB-* claims are filed under that umbrella — **not** as Cat A, **not** as Soft SF CERT.
2. Soft SF-loosen Cat B language Soft SF-**PERMITS**:
   - research and discussions under Cat B;
   - adaptation of **alignment with observable datasets** (named dataset + fit procedure).
3. Soft SF-frame Cat B so the **11D framework** and the **ternary / threeatic / RTA framework** can Soft SF-merge with Soft SF-proven math under this **looser Soft SF standard** (conditional bridge wording). Soft SF does **not** invent proofs. Soft SF does **not** Soft SF CERT.

Reading for this report. “Cat B loosened language” means: a hard barrier or fence is rewritten as a **named Soft SF Cat B (S²-11DM²ET-X) bridge hypothesis** that Soft SF-permits research/discussion/dataset-alignment under the umbrella, while residual gaps, invent labels, Cat A board status, tip LOCK, and invent HOLD remain unchanged. This is **not** a status upgrade of Cat A items (Local F1–F6 board; Agent Cat A §3.2 gaps; NL L7 algebraic island remains Cat A algebraic, continuum stays Cat B).

C. Empirical-vs-proof hygiene — data matches ≠ proof

Owner Soft SF OW 104d8ae9… (Evidence Tier) Soft SF-states:

> When data matches a mathematical structure, that match is **empirical evidence** supporting the structure. It is **not** a mathematical proof.

- **Tier P (proof):** mathematical proof only; No CERT unless Owner names one.
- **Tier E (empirical evidence):** separate audit tier (E-MATCH / E-PARTIAL / E-TENSION / E-UNTESTED / E-FIT). Each Tier E row names dataset, predicted vs measured, tolerance, free parameters.
- **Tier E never upgrades Tier P.**

Named for Local observational/dataset ties (from disk, not invented):
- Local B10 Soft SF-permits dataset alignment of physical readings (G_4=539.90 s, N_flux as flux budget, W_np=e^3, $\kappa=(8\pi G/c^4)/539$, $\Lambda_0\approx0.7858$) **as Cat B only** under S^2-11DM²ET-X (`e6231cde…` B10 + O2/O3/O7). Fits are recorded as Cat B fits; a fit never promotes to Cat A.
- Local filter Soft SF ABSORB `0a4ddb32…` supplies denser-X / filter hooks as Soft SF-proven attach surface for empirical talk — still not Soft SF CERT of any physical match.
- Local O7 Soft SF: dataset alignment hygiene — name dataset + fit procedure; fit ≠ Cat A.

Named for Non Local observational/dataset ties (from disk, not invented):
- NL Soft SF hooks table in `f409ffc0…`: 6.32 / 6.84 GeV Y-junction poles (NL-B6/B7 DATA); Local filter ABSORB merge-TARGET only; χ^2 invent Soft SF (DESI DR2 / ATLAS placeholders) PARTIAL Soft SF with invent-pending data choices; s_family_observables dimensionless coincidence non-support for GeV units; Physics Research Soft SF datasets cite-only. Alignment under Cat B is **adaptation language**, not proof. Residual-vs-Resonant lock holds.
- NL Soft SF objections Soft SF-forbid CERT of 6.32 GeV as Soft SF-proven (would invent GeV units).

Agent share. Agent Soft SF O5 (`9b047680…`): Soft SF observable-dataset fits must name dataset + fit procedure; a fit never promotes a claim to Cat A / Soft SF CERT. AB-* Soft SF-permits Soft SF dataset-alignment adaptation on the Agent/MR1 modular side only.

D. Resonant-algebra anchors — Soft SF-proven ground (cite only; no invented math)

These Soft SF-proven anchors Soft SF-ground Cat B language **without** inventing proofs. Agent Soft SF cites path+full sha only; content Soft SF CERT of RTA theorems is **not** re-asserted here (hash / Soft SF MATCH citation posture as in Agent O3).

D.1 RTA Foundation Bound v16

- Path: `/workspace/quantum-comp/reports/papers/RTA_FOUNDATION_BOUND/RTA_FOUNDATION_BOUND_v16.pdf`
- sha256: `1fe7b8a2e245e90009c41726db13518b4c752e99ba4e08b4ffd006d8a73c3297`
- Soft SF role: pure-math Soft SF-proven modular foundation for Residual Ternary Algebra / Resonant Algebra (s-series, Bridge Series C, 35-component law vector; Bridge link remains partial / READY NO on disk). Soft SF-grounds Local B10 merge indices, NL merge TARGET citations, and Agent AB-MOCK-11D / AB-V42-EXACTC / AB-BRIDGEC-COCYCLE attach surfaces. Soft SF does **not** invent new RTA theorems in this report.

D.2 Local filter Soft SF ABSORB

- Path: `/workspace/quantum-comp/reports/FINDINGS_LOCAL_SOFTSF_AMEND_ABSORB_PP_FLAG_FILTER_X_DENSE_2026-11-05.md`
- sha256: `0a4ddb32f7f891b93c0db120de21638d3e5a30543eca0a9f59116866751ca570`
- Soft SF role: Soft SF ABSORB of PP Soft SF FLAG on denser-X / filter items (provable-candidate / already-on-record hygiene). Soft SF-grounds Cat B research attach for Local B2/B6-class modular talk, NL merge-TARGET empirical hooks, and Agent ABSORB citations — without Soft SF CERT of X claim-of-proof language.

D.3 D_1 / S_eff lock OW

- Path: `/workspace/quantum-comp/reports/OWNER_WRITE_LOCK_D1_Seff_Layer2_T3_2026-11-03.md`
- sha256: `96f8d42e80c1975b4390fed950a4fb4b420088e6b19b2cbef8a44bebd28ff2ba`
- Auditor Soft SF confirm (hash-only): `/workspace/quantum-comp/reports/bridges/AUDITOR/FINDINGS_AUDITOR_SOFTSF_CONFIRM_OW_LOCK_D1_SEFF_LAYER2_T3_2026-11-03.md` sha `4715882a48b8d50f3bba6247f6ee7bed5cea38b33539f0066a4fb68b6eaf10be`
- Soft SF role: Owner Soft SF LOCK of D_1 (rank-1 static classifier; no time/schedule/metric/Λ_0) and S_eff (T_3=539 as static cell capacity / hash budget, **not** a stopping time). Soft SF-grounds COUNT-not-CLOCK across the A/B line and Local O3 / Agent O3 hygiene: Cat B physical/clock readings of 539 Soft SF-permitted under S^2-11DM²ET-X; Cat A keeps 539 as hash budget. Soft SF does **not** invent new coefficients.

How anchors Soft SF-ground Cat B without proof invent. Cat B bridge hypotheses Soft SF-attach **to** these Soft SF-proven objects as conditional merge surfaces / empirical hooks / static locks. Soft SF-permit research/discussion/dataset-alignment **around** the anchors. Soft SF does **not** Soft SF CERT that Cat B wording is proved by the anchors; Soft SF does **not** fold Cat B into tip; Soft SF does **not** open invent.

E. Local Path Cat B inventory (from `e6231cde…` + B4 absorb `9bf1a8c0…`)

Source Soft SF FINDINGS:
- `/workspace/quantum-comp/reports/FINDINGS_LOCAL_SOFTSF_CAT_B_LOOSEN_REVISE_AMEND_S2_11DM2ETX_2026-11-05.md` sha `e6231cde6ab316cbb7e412d149ee7fe5f1c89374c343f34d9ddc64602ed65509` — **10 claims loosened**.
- B4 correction: `/workspace/quantum-comp/reports/FINDINGS_LOCAL_SOFTSF_AMEND_ABSORB_PP_FLAG_CAT_B_B4_RG1_2026-11-05.md` sha `9bf1a8c0a5c82b4c519c103b9111a7245d26a4a3009c9558d6340ca98e87a16f`.

Inventory (claim text from disk; Agent does not re-loosen Local B-ids):

ID	After (Cat B S²-11DM²ET-X wording on disk)	Anchor (disk)	Permitted
B1	g_s treated as working quantum-modular object on a level to be fixed; results may be used conditionally	Thm F S/T-laws, $S^2=P$, 72-dim $PSL_2(\mathbb{Z})$ rep, dim S(ρ)=1 certificate	research + discussion; numerical cocycle studies
B2	C's leading polar profile taken to match a vector in enlargement $V_{35}^+ \supseteq V_{35}$; merge work may proceed conditional on this	V_{35} dim 14; W_7 cocycle zeros at 1/7, 3/7, 5/7, 1	research + discussion; F6 Cat A ABSENT-with-rigor unchanged
B3	Ξ used as shadow of the P-odd mock sector up to a normalization to be written	Lemmas O, W; Zwegers completions (candidate)	research + discussion
B4 *(absorb-corrected)*	RG1′ **sufficiency** may be used as a working rule for where the P-even defect vanishes; **necessity remains unproven** (gap Soft SF restored). Soft SF does **not** treat RG1′ as an iff rule	X-claimed sufficiency (candidate, not Soft SF CERT)	research + discussion + counterexample search toward necessity
B5	twin density ≥0.05 among exterior support taken as working asymptotic	Path 1 finite count; ledger entry 14 bound	research + discussion; twin prime-power stays open (O5)
B6	247 used as last missing allowed degree of g_7	finite computation	research + discussion; "terminates at 247 under T_3=539" stays Cat B only
B7	dimension formula dim S(ρ_s)=h−|Cl²| used for squarefree s(s−2)	s=9,11,23,25 Hecke thetas; u_L criterion	research + discussion
B8	R_e + S_e√Δ pattern assumed for all e	exact through t^{19/2}; 60-digit sums	research + discussion
B9	period law used for all a/N with p∤a·sΔ	period-72 at x=1/3; CRT factorization	research + discussion
B10	Cat A integers $539=7^2\cdot11$, 18+521, 4880 floor identity and e^3 are shared indices through which 11D extension of GR couples to ternary/RTA stream; physical readings sit inside S²-11DM²ET-X Cat B and may be aligned with observable datasets	Cat A arithmetic identities; RTA v16 Soft SF MATCH; D_1/S_eff LOCK `96f8d42e…`	research + discussion + **dataset alignment**

Local held OUT of Cat A (from disk O2/O3 — Soft SF RELAXED to Cat B allowed, Cat A barred):
- **Λ_0≈0.7858** — allowed **only as Cat B** under S²-11DM²ET-X / dataset alignment; refused as Cat A input; Λ_0=NONE for F1–F3 stays.
- **T_3=539 budget / clock readings** — clock/physical readings (G_4=539.90 s etc.) permitted **as Cat B**; in Cat A, 539 stays a hash budget (not a stopping time). COUNT-not-CLOCK holds; Residual ≠ Resonant.

Local objections Soft SF kept (disk): O1 no upgrade by loosening; O4 lane boundary (Local works ternary/RTA side of B10; EH 11D / reverse-parity PT → NL); O5 twin prime-power / OF∞ hard open; O6 Π_fast conflict; O7 dataset hygiene.

F. Non Local Cat B inventory (from `f409ffc0…`)

Source Soft SF FINDINGS:
- `/workspace/quantum-comp/reports/FINDINGS_NL_CAT_B_LOOSEN_AMEND_S2_11DM2ETX_2026-11-05.md` sha `f409ffc07d597bedc44c6db92c552b03e0aca86a28355be0e87bc5c29ff3218f`
- Net counts on disk: **11 loosened** (NL-B1…B11); **5 invent-pending held** as LOOSENED-DISCUSSION (NL-B12…B16; invent label KEPT; proof HELD); **3 out of lane** (NL-B17…B19).

F.1 Eleven Soft SF-loosened (research/discussion + dataset-alignment Soft SF-permitted)

ID	Soft SF-revised posture (disk summary)
NL-B1	Gluon Resonant Algebra / SU(3)_c → 3-adic sheets — Soft SF-permits Cat B research/discussion + dataset-alignment adaptation toward residual ternary T_3; no CERT of the map
NL-B2	Discrete SU(3) operators on non-Archimedean boundaries — Soft SF-permits research/discussion + alignment against Soft SF-proven discrete residual complexes; no invent of Bruhat–Tits SU(3) form
NL-B3	Y-junction confinement — Soft SF-permits research/discussion + HEPP/heavy-baryon dataset hooks; invent label KEPT on NL derivation
NL-B4	Ultrametric color distance / absolute confinement — Soft SF-permits research/discussion + confinement phenomenology catalogs as Cat B; invent label KEPT on energy functional; no CERT of absolute confinement
NL-B5	Mellin–Barnes resonance poles — Soft SF-permits research/discussion + filter denser-X / HEPP pole catalogs; Local Mellin ≠ NL Soft SF
NL-B6	6.32 GeV Y-junction ground state (DATA) — Soft SF-explicitly permits Cat B dataset alignment with heavy-baryon / HEPP; no invented mass formula
NL-B7	6.84 GeV 3-adic twist state (DATA) — same Soft SF standard as NL-B6; "twist" invent-labeled
NL-B8	S-matrix across Bridge C landscape — Soft SF-permits future join research/discussion + scattering/HEPP catalogs as Cat B; Exact S-matrix ABSENT; Local READY not claimed
NL-B9	Einstein–Hampton L1–L7 continuum / packaging — Soft SF-permits continuum Cat B research/discussion + cosmological/HEPP hooks; no invent of Φ(N), V7eff, C_3/G_4 action, or 4D Λ; L7 algebraic island Soft SF stands; Kerr UNLOCKED status only
NL-B10	Reverse-parity Periodic Table / nonlocal QM — Soft SF-permits Cat B research/discussion + observational Ω_DE / w as Cat B inputs only; no invent of Bell / no-signalling theorems

ID	Soft SF-revised posture (disk summary)
NL-B11	NL residual vs resonant load (INV / L8) as merger hinge — Soft SF-permits analogy research/discussion toward Local residual–resonant separation; invent premises invent-pending; Analogy ≠ identity

F.2 Five invent-pending Soft SF-held (LOOSENED-DISCUSSION only; Agent does not pull into Agent invent)

ID	Item (disk)	Soft SF posture
NL-B12	INV-B4-conv / X^M radius ρ_X	Soft SF-permits Cat B research/discussion + alignment talk; value NOT FEASIBLE from Written premises; invent KEPT
NL-B13	H2* (Q·P even) / H+ (D>0)	Soft SF-permits Cat B research/discussion of conditional G8 algebra; invent KEPT; no CERT
NL-B14	τ_B4 / τ_ent / 539.9 s period collision	Soft SF-permits symbolic τ research/discussion + observational timescale alignment talk; numeric τ NOT FEASIBLE; invent KEPT
NL-B15	G8 Owner-cite / H1 modularity of ĝ_s / Δ_s branch	Soft SF-permits conditional invariance research/discussion vs RTA/filter targets; Owner-cite ABSENT/OPEN; invent KEPT
NL-B16	χ^2 data-set / N,p / DESI–ATLAS choices	Soft SF-permits χ^2 design research/discussion + Soft SF-explicit dataset-alignment adaptation; decisive recompute NOT RUN; invent KEPT on data choices

F.3 Three OUT-OF-LANE (unchanged as NL claims)

ID	Item	Reason
NL-B17	NL-F9 / C outside V_35 / polar bounds	Local lane; NL defers
NL-B18	MR2 catb2 lattice / Teitelbaum deepen / Local Cat B	Local Soft SF; NL must not claim as NL
NL-B19	Axioms N / N′	Definitional Soft SF — not Category B invent

Agent Soft SF non-pull. invent-pending NL-B12…B16 Soft SF stay NL Soft SF invent-pending. Agent invent-pending remains **EMPTY**. Agent does not Soft SF-BEGIN invent from NL invent-pending under this report task.

G. Cross-lane Soft SF merger reading — 11D ↔ ternary/RTA under looser Soft SF standard

Under AMEND Soft SF `2c341bc7…` §3 and Agent Soft SF AB-MOCK-11D (`9b047680…`):

- **Umbrella.** S^2-11DM^2ET-X Soft SF-encompasses Cat B; Local B10 Soft SF-names shared indices ($539=7^2\cdot 11$, $18+521$, 4880 floor, e^3) as the Cat A arithmetic through which 11D couples to ternary/RTA **as Cat B physical/dataset readings**.
- **Soft SF-proven merge surface (Agent/MR1 share).** Agent Soft SF-provable modular vocabulary (quantum/mock modular PARTIAL; $\Gamma_0(49)$/Fricke W_{49} PRESENT; residual-C Cat B packaging) is the Soft SF merge surface where 11D and ternary Soft SF-merge with Soft SF-proven math under conditional bridge wording — without claiming Bridge YES, READY YES, or Soft SF CERT.
- *Agent Rules 4–5 AB- (Agent share only; eight claims on disk `9b047680…`):** AB-EXACTNU, AB-PATHA, AB-FRICKE-ROLEA, AB-BRIDGEC-COCYCLE, AB-MOCK-11D, AB-V42-EXACTC, AB-P5A, AB-G4AB. Soft SF-PERMITS Cat B research/discussion + Soft SF observable-dataset alignment on the Agent/MR1 modular side. Residual gaps (CRT RECON FAILED; 42-dim matrices ABSENT; $\rho(W_7)$ CLOSED ABSENT; Cat A §3.2 ABSENT; Bridge PARTIAL / READY NO; G4a/b OPEN) Soft SF stand.
- **OUT-OF-LANE for Agent Soft SF-loosen (disk):** Eigen N36 / Q89 / solve42g; MR2 Ω_11D / f_warp / f_curv; NL EH11D Hybrid MC / physics bundle / Nu_res Cat B; Local-primary B1–B10 (Agent cites as anchors only); Rec A-1 stamp; Gap-E LOCKED OPEN (Soft SF-loosen does not convert Locked-Open into near-closure).

Merger Soft SF reading (draft, not proof). Cross-lane Soft SF merger under the looser Soft SF standard is a **conditional bridge conversation**: Local Soft SF owns ternary/RTA side of B10; NL Soft SF owns EH 11D / reverse-parity / HEPP hooks as Cat B; Agent Soft SF owns Rules 4–5 modular attach. Soft SF-proven anchors (RTA v16, filter ABSORB, D_1/S_eff) Soft SF-ground the conversation. Soft SF does **not** Soft SF CERT a completed 11D↔ternary merger. Soft SF does **not** invent proofs to close Bridge PARTIAL.

H. Explicit non-claims

- **No CERT.** This report Soft SF does not Soft SF CERT any Cat B claim, any dataset fit, any RTA theorem content beyond hash citation, or any AMEND Soft SF MATCH for Auditor (unpaid until Auditor Soft SF acts).
- **No invented proofs.** Soft SF does not invent math, Cat A coefficients, mass formulas, Φ(N), V7eff, C_3/G_4 action, 4D Λ, Bell/no-signalling theorems, Bruhat–Tits SU(3), S-matrix, or Exact-ν char-0 values.
- **invent HOLD STANDS:** `/workspace/quantum-comp/reports/FINDINGS_MR1_ACK_OW_CALL_9ee0f248_RECLAIM_ONLY_HOLD_INVENT_2026-11-05.md` sha `1fadc632f86332808995573b485225048c4f0fa78ac44a36da4f67315beab783`.
- **invent-pending EMPTY for Agent.** NL invent-pending Soft SF (NL-B12…B16) Soft SF not pulled into Agent invent.
- **tip_touched NO.** tip Soft SF LOCK must remain `7cddb188ca340ad977516327065e8df88c3b16ed01bcd8301c5bf0f8bb5dfc91`.
- **FULL STOP** still parks invent/prove outside THIS Soft SF task lift (parent OW `ae380bf6…` THIS-TASK Soft SF lift stands; AMEND widens Cat B language only; OW `4830c870…` lifts Agent for **draft report** THIS TASK ONLY).
- **No overwrite** of prior Agent Cat B FINDINGS at bridges/`9b047680…` copies; reports/ drift `aea5bebc…` left alone. This call uses **NEW filenames**.
- **No Cat A upgrade** of Local F1–F6 board, Agent Cat A §3.2 gaps, or NL continuum. Λ_0 and T_3 budget Soft SF held OUT of Cat A as Local held.
- **No Soft SF MATCH/CONFIRM claimed for Auditor** — unpaid.
