order41 RESULTS: RG38, blind two-variable design
PREREG sha256 46b8377c9a1a852caa734813797ef7c013453c07513e57d35f08e40ea616df3f (hashed before numerics). order19 comps() verbatim; κând M fixed (no refit).
RG38: PASS (Category B; blind)
num \ den	1	2	4	5
61	0.009468	0.004227	0.002901	0.002190
67	0.009002	0.003989	0.002744	0.002079
71	0.008725	0.003864	0.002661	0.001986
17/17 strict decreases (0 violations). Prediction PASS: correct.
Reading
- The per-point miss of the C2b fixed-M law decreases strictly in both |num(x)| and den(x) on this design.
- The den direction is much stronger (×4.3 from den 1 to 5) than the num direction (×1.09 from 61 to 71).
- No exponent is claimed.
Category
B only. A: none. v11: no. Ξ: not identified. E1–E3 OPEN.

order41 NOTES
- This is the first blind out-of-sample structural pass on the per-point miss: it is monotone in both variables. It replaces the closed |num|-alone hypothesis (orders 37–39).
- Next: order42 RG39 (exact L_B prediction at integer x).
- Naming: RG* only, no labels L1–L7. MAPS_CANDIDATES untouched; no Resonant objects; no new objects; no bridge claim; CORE_FREEZE; nice, OMP_NUM_THREADS=1, ~6 s; no push or sends.
